OBJECTIVE

Aspiring web developer with a strong foundation in front-end development. Eager to contribute to **innovative projects**, collaborate with dynamic teams, and continuously grow in modern web technologies. Committed to solving real-world problems and achieving **professional growth**.

PROJECTS

Personal Portfolio

[Live Site](#)

- Architected and developed a compelling **personal portfolio website** using **HTML**, **CSS**, and **JavaScript**, prioritizing **intuitive design**, responsiveness, and user engagement. The site highlights key sections such as **Skills**, **Projects**, **Experience**, and **Education**, showcasing both professionalism and creativity.

E-Commerce Website

[GitHub](#)

- This project is a user-friendly e-commerce website built using **HTML5**, **CSS3**, **JavaScript**, and **modern UI design principles**. The website is designed to provide a smooth online shopping experience with a clean layout and intuitive navigation.
- The **UI (User Interface)** is carefully crafted to highlight products in an attractive way, featuring sections like a **homepage with banners and featured items**, **product listing pages**, **product detail pages**, a **shopping cart**, and a **checkout process**.

School Management System

[GitHub](#)

- This project is a complete **School Management System** designed and developed using **HTML5**, **CSS3**, **JavaScript**, **Bootstrap**, and **React.js**. The application is built with a modern and responsive **UI/UX** that adapts seamlessly to desktops, tablets, and mobile devices.
- The system provides an **Admin Panel** for managing teachers, blogs, gallery, and other school-related activities. It uses **React Hooks** for state management, **React Router DOM** for smooth navigation between pages, and Redux to efficiently manage global application state.
- Data communication between the front-end and server is handled using **RESTful APIs**, ensuring real-time updates and dynamic functionality like adding, editing, and deleting records.

Myntra Clone Project

[GitHub](#)

- This project is a **fully functional clone of the popular Myntra e-commerce platform**, developed using **HTML5**, **CSS3**, **JavaScript**, **Bootstrap**, **React.js**, and **Vite**. It provides a modern, and user-friendly shopping experience with a clean interface and optimized performance powered by Vite.
- The website is built with **React Hooks** for managing component logic, **Redux** for global state management, and **React Router DOM** for smooth navigation between pages such as **Home**, and **Cart**.

Mini Projects
